Fluid control components &
Silicone molding parts
FUJIKURA COMPOSITES Inc.

Business Outline

We are an ISO 9001, 14001 and 13485 certified custom manufacturer of fluid control components and liquid silicone-rubber injection molding. We have a history of over 100 years and our products span a vast range, including air regulators, air cylinder, relief valves, check valves, O-ring, diaphragm, CFRP, Golf shaft, etc based on our composite technology.

Strengths/Specialty

[Fluid control components]

- Compact, Precision, Reasonable air regulator and auxiliary valves

[Liquid silicone-rubber injection molding]

- Cost-effective, Low chance of contamination, High-volume production of complex liquid silicone injection molding parts.

Contact Person	Yuichi Kurosawa (Mr.)
E-mail	kuros-yu@fc.fujikura.co.jp
URL	https://www.fujikura-control.com/english
Tel.	+81-90-5750-2955
Main Product/ Technology	Fluid control components Silicone-rubber injection molding
Certificate	ISO14001, ISO9001, ISO13485

- Duckbills
- Umbrellas
- O-rings
- Check valves with resin

- Check valve (SUS / Brass)
- Relief valve (SUS / Brass)

- Compact regulator
- Liquid pressure regulator (SUS / Resin)

Innovative Metal Tubes
KAKOH Co., LTD.

Business Outline

We manufacture super high-precision metal tubes and pipes in our own factories. We currently supply to local and overseas manufacturers of endoscopes, nozzles, analytical equipment (chromatography) and syringes. We are second to none in producing small diameter metal pipes. Since established in 1964 as a manufacturer of electric discharge machining (EDM) small hole pipe electrodes, we have responded to various requirements.

Strengths/Specialty

- Irregular Tubes (custom made)
Various specifications such as square, elliptical and bent pipes
- Various Materials
- Pipes of copper, brass, stainless, and even hard-to-cut materials such as Titanium(alloy) and CCM
- Small Lot Production
From one unit, we deal with trial production/development as well

Contact Person	Kazuhisa Kida
E-mail	info@kakoh.com
URL	http://www.kakoh.com/en
Tel./Fax	+81-3-3902-7646 / +81-3-3903-6311
Main Product/Technology	Precision metal tubes in any material and any shape requested

Ultra-High Precision Machining
KANEKO Manufacturing Co., Ltd.

Business Outline

We have 65 years of experiences in high precision machining on metals, resins, and machinable ceramics. We are also expert in brazing and bonding for sub-assembly.

Strengths/Specialty

- We specialize in machining of tiny, thin, and complex shaped precision parts using five-axis machining centers.
- We are committed to supply stable quality from just one piece to mass production with enhanced quality management system.
- Developing multi-view and glasses-free 3D endoscope system, which includes the patented technology for 3D image processing (Patent No. US 10,148,931 B2), we made a prototype of 3D rigid endoscope for demonstration.
- Our products are traceable from the materials based on the ISO standards (ISO 13485, ISO 9001, JIS Q 9100).

Contact Person	Maiko Sakura
E-mail	sakura-m@t-kaneko.co.jp
URL	http://www.t-kaneko.co.jp/en/
Tel./Fax	+81-48-794-8111 / +81-48-794-8117
Main Product/Technology	<ul style="list-style-type: none">• Parts for Medical endoscope, Heart pacemaker, Pump oxygenator, Anesthesia equipment, and Cauterization instrument• FINISHED PRODUCTS: Water bottle for medical endoscope (Class I)• Parts for aircraft bodies and engines• Optical related parts such as lens barrel
Certificate	ISO 13485, ISO 9001, JIS Q 9100

One Stop Solution with Clean Rooms

KYOWA SEIKO CO., LTD.

Business Outline

We manufacture one-stop solution for injection molding, assembly, inspection, and packaging, all done in our clean rooms (8 rooms in total, ISO 7). More than 80% of our products are for medical devices.

We have experience trading with major manufacturing companies; dental, medical products, pharmaceutical medical devices, special anaesthetic needles, safety & sanitary tools, and cosmetics. With our reputation and years of accomplishments, clients have entrusted us with orders for disposable plastic containers (specifically) for Covid-19 test kits.

Strengths/Specialty

- We manufacture in our Clean Rooms (ISO 7)
- We guarantee outstanding safety
- High praise for our high quality & management systems

Innovation in sports training for
perception and decision making
SOKENMEDICAL Co.,Ltd.

Business Outline

Good Training and conditioning for all sports

- Cooperative research with universities, acquired evidence which resulted in new product development.
- University research has proved our products to be highly effective.

Strengths/Specialty

- Winnerlights is an innovative perception training system providing effective training methods to improve the perception and decision-making skills required for various kinds of sports.
- Sokenrelax is widely used for maintain health and body conditioning.

Medical AI System
H.I.T Co., Ltd.

Business Outline

Development, sales, and maintenance of medical application products (system, software).

Our main product is a medical check-up software application, "Medical check-up NAVI". With this software, starting a medical check-up project in hospitals or clinics smoothly.

We hope to contribute to your country's preventive medicine.

Strengths/Specialty

Early detection and treatment is the best way to live a healthy life. To live a healthy life, we suppose you a regular medical check-up.

Our software "Medical Check-up NAVI" supports almost all operations of a medical check-up. Managing the patient's information, making a medical checkup schedule, recording medical exam results, and making many kinds of documents or check-up reports. And also, we can make data linkage with other medical software.

Support for International Expansion Saitama City Foundation for Business Creation

Business Outline

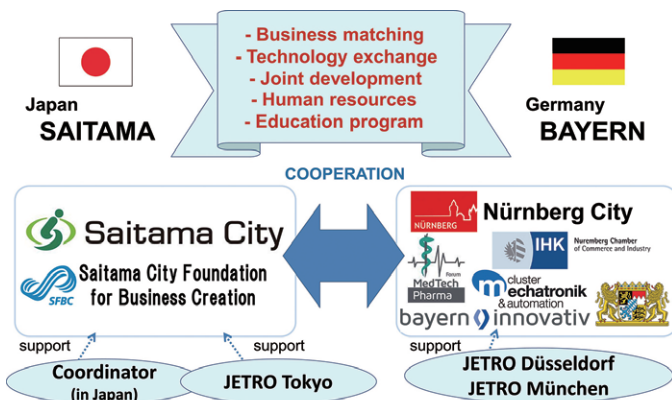

Saitama City Foundation for Business Creation is a public foundation, established by Saitama City. We are in charge of supporting small to medium companies in Saitama.

Since 2011, the city of Saitama has been coordinating business matchings and technical exchanges between Saitama companies and German companies, supported by JETRO (Japan External Trade Organization), which is responsible for interregional exchange projects (RIT projects). After the end of a three-year funding period by JETRO, we issued a memorandum of understanding (MOU) for company cooperation with the "Forum MedTech Pharma e.V.", "Bayern Innovativ GmbH", "Cluster Mechatronik & Automation e.V.", "IHK Nuremberg" (2014), and most recently, "Nuremberg City" (2019). With the establishment of a deep trust relationship through frequent exchanges over the past ten years, the information received from Germany as well as the need for technical collaborations has increased. As a result, the number of companies from Saitama - which are targeting sales in Germany - are growing.

We have exhibited at COMPAMED since 2014, and MEDICA since 2017.
